Q.
What do I do after I replace batteries?
After changing the battery, wait until the watch display re-appears, then press all 4 buttons together to reset.

What do I do if I need a repair or replacement?
All watches come with a warranty against manufacturer defect or failure for a period of 90 days from the date of purchase. This warranty covers replacement or repair of the product, which is determined by availability, and the time of purchase. Replacement is often used within 30 days after purchase with the same product or like product when repair service is unavailable. Please note: Watch bands and batteries are NOT covered by this warranty. Proof of purchase is required.

Do you have a return policy?
First, contact the retailer from where your watch was purchased, as it may be covered under their return/repair policy. If your watch is not covered by the retailer and is still within our direct warranty, please contact us at: service@nookawatch.com to obtain an RMA number and address to send defective merchandise. Service outside of the warranty period is provided with a small parts and labor charge, please inquire.
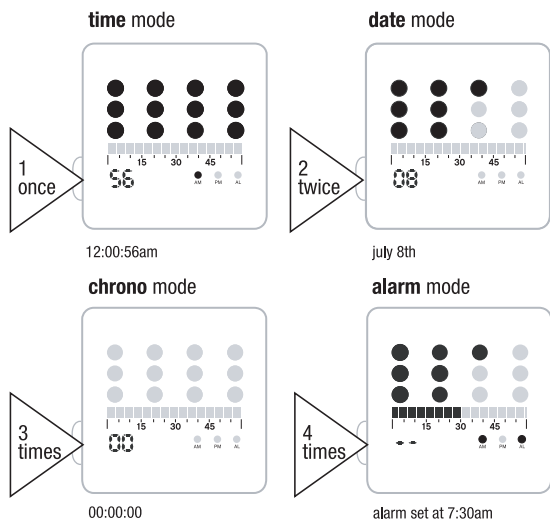

Warranty Ticket on the reversed side.

Function and specs are subject to change, please check for latest instruction book updates on http://www.nooka.com/service

About NOOKA

Nooka is the brainchild of artist and designer, Matthew Waldman. He conceived the idea for Nooka after staring at a large wall clock in a London hotel and wondering why there are so few options for time display. He then sketched his ideas for potential designs on a napkin and brought them back to New York. After working on the designs, he submitted them to his legal team, and indeed, they were unique enough to patent!

The linear and graphic representation of time with Nooka watches presents a more intuitive way to view time. The visual mass increases as time passes, giving weight to an ephemeral and abstract concept. Once you're used to the new visual paradigm, you may never go back to standard analog and digital time displays for your wrist.
